

Oriental Herbal Nutrient (OHN)

- Natural Pest repellent. It is used throughout the early, vegetative and change over and fruiting stages.
- Is a very important input in natural farming
- To develop the immune system of your plant and animals

1

Ingredients:
 8 kilo crushed ginger for plants/
 garlic for animals
 2 kilos muscovado sugar
 10 liters of gin or liquor 30-40 proof
 Use ceramic or glass jar

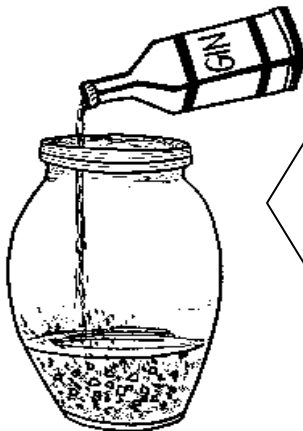

2/3

1/3

2

Divide container into three parts. Mix ginger /garlic and muscovado sugar together preferably by hand and put inside jar cover and sealed ferment for seven days.

3

After seven days add 10 liters of gin. Cover and sealed. Decant liquid after ten days. **First extraction is good for animal.** Second extraction is good for plants. Just add gin same amount taken from the first extraction. You may add fresh or dry chili, neem fruit, curry fruit, makabuhay, and marigold for stronger potency and repeat same process the third time. And continue to ferment for ten days.

Together with other mixtures spray on plants every week when they weaken or start to flower.

4

HOW TO USE THE CONCOCTION

1. Mix the following
 - 2 tablespoons of OHN to 1 liter of water
2. Add to the IMO and FPJ mixture and spray together on the leaves and soil every week
